- Final project commercial/vlog demonstrating the fully working project, emphasizing key interactive experiences of the completed ("done") MVP(s) (you can create the vlog like an advertisement, highlighting key experiences of your team's solution/innovation). your team's vlog should highlight and rationalize why you think what your team has accomplished fulfills a true MVP
  - The vlog should be at least 1 minute and no longer than 3 minutes. It can loosely follow the presentation requirements listed below. However, it should more focus on the why and the what of your software solution.

Why? We think learning should be an efficient and collaborative experience, instead of an isolated personal obligation.

What? - Our project will be a note taking web app that can be used to share notes with peers, and access the shared notes of other users.

Final MVP:

- Sign Up/ Log In: As a user, I want to be able to make an account so I can make and share notes.
- Note Editor Page: As a student, I want to be able to take notes on my Laptop.
- Showing one Users able to access notes edited by another: As a student, I want to have the option to share my notes with my peers (or access theirs) so that if people have missed notes they can use mine or others.

User Experiences to show in the demo:

- Log In: this will show that a user is able to create a personal account to access their notes, helping us achieve a key facet of our true MVP.
- Create Folder
- Go into the folder
- Create a Note
- Log out
- Sign Up
- See the new folder
